ANA VALDIVIA

SUMMARY

Full Stack Developer with a background in Mathematics and experience in project management targeting a role dedicated to user interface optimization. Quick thinking and eager to learn, I'm ready to take on any given language or tool in order to create complex and sleek designs.

PROJECTS

Codify | Jun. 2020
- Used a MERN Stack with MongoDB and Mongoose (ODM) for our database.
- Implemented the frontend in React and Materialize CSS while using Node.js.
- Designed overall component structure of the application.
- Implemented REST API calls and updated the state throughout the application using React hooks, such as useEffect and setState.

WeTrivia | Apr. 2020
- Used MySQL to build the database to store the high scores.
- Served the app on Express framework with Node.js.
- Implemented the design using Bulma and incorporated Socket.io for mobile responsive functionality.
- Created and implemented the AJAX call that retrieved data from the trivia API.
- Constructed the logic for the trivia game, parsing and randomizing the data to promote in-game interactivity.

Local Eats | Feb. 2020
- Serverless responsive app created using Javascript, CSS, and HTML.
- Implemented the AJAX call that retrieves data from the Zomato API.
- Designed the logic used to allow the user to filter their searches.
- Assisted in adding responsiveness to the app using Skeleton.

WORK EXPERIENCE

Emptech | Oct. 2016 to Current

Unemployment Tax Manager   Torrance, CA

- Manage daily operations of a team that delivers unemployment tax rate information to over 50 clients with multiple accounts.
- Collaborated on migrating large amounts of historic data through Excel which reduced production time by 75%.
- Identified key calculation variables based on state requirements that were vital for the implementation of the platform.
- Evaluate the platform's accuracy and consistency in calculating tax rates.

Vons | Sep. 2009 to Jul. 2018

Bookkeeper   Redondo Beach, CA

- Managed and created detailed documentation of daily financial transactions.
- Maintained accurate store-wide financial records and produced daily financial reports.
- Performed bank and account reconciliations by updating ledgers on a daily basis using VeriBalance and Excel.
- Handled 50+ customer interactions per day, giving detailed, personalized, friendly and polite service.
